Portfolio

<https://dhall88.github.io/>

Once a Scientist and Personal Trainer, now a Full-stack Engineer, I love working with people and working through projects. When I am given a task, I complete it. Grappling with big problems feeds my mind, and solving them feeds my soul.

Skill Highlights

Complex problem solver
Interpersonal skills
Avid learner

Never-say-die attitude
Dependable
Service-focused

Projects

- Fruit Tanks – A browser tank game using JQuery, simple Newtonian Mechanics, and crazy fruit artillery. Players take turns selecting the artillery of choice, taking wind into account, and blowing up their opponent first.
- Expanded Pokedex – An online Pokedex clone utilizing Mongo, Express and a third party API.
- Plot-Master – A garden plot manager using Express, Mongo and React. Make an account and start planning your vegetable garden today!
- Better Recipes – Skip the mile long blog posts every time you want to cook. This app utilizes Rails and React to create a SPA that shows ingredients, instructions, and custom timers all in one spot.
- Wirhal Family Utilities – A suite of apps inspired by my family, for my family. Matching game for my 4 year old, math drills for my 8 year old, and a weather app that offers clothing choices based on a 12 hour forecast for my wife.

Experience

Hall's Historic Homesites: **Owner and Operator** 2012-Present

Property investment and rental company. I scouted investment opportunities, coordinated with contractors, completed minor handy man work, screened tenants, and organized financial information. Starting in 2018, day to day operations were transferred to a third party company. I still keep my eyes peeled for interesting properties.

ACAC: **Personal Trainer and Therapy Extender** 2018-2019

Created and implemented exercise plans for individuals looking to improve specific aspects of their physical health. I also implemented programs designed by physical therapists for individuals coming back from surgery or serious injury.

Education

Bachelor of Arts: **Physics** 2007-2011

Goucher College, MD

Software Engineering Immersive Course - 2019-2020

General Assembly

Languages and Frameworks

Programming Languages: **JavaScript, jQuery, HTML5, CSS, SQL, MongoDB, Express, React, Redux, Express, Node, Java, C, Bootstrap, AWS**
